Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1, 3-8, 28-49, and 53-57, drawn to a single requesting user indicating to multiple target users the want to initiate separate, disjoint in time meetings with each of the target users, the requester user connected to a single target user as the target and requester become mutually available, classified in class 705, subclass 8.

II. Claims 9 and 12-16, drawn to arranging meetings with a single target, the target user receiving multiple request by requesting users, each of these requests for separate meetings occurring between the target and one of the requesting users, classified in class 705, subclass 8.

III. Claims 58-59, 62-65, and 68-71, drawn to a user interface displaying the ID and availability status of users, classified in class 705, subclass 10.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as allowing a user to initiate multiple meeting requests simultaneously, partaking in the meetings as availability allows. Invention II has the separate utility of allowing a user who has received meeting requests to facilitate each of the meetings (i.e. the user is responding to received requests rather than initiating the requests). Invention III has the separate of a creating a display of user IDs and availabilities (with no coordination of meetings occurring). See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, the search for Group II is not required for Group III, and the search required for Group III is not required for Group I, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
